

taking REMOTE CONTROL of SECURITY

intelligent CCTV

The benefits:

- ☀ Live Intervention
- ☀ Stops Crime
- ☀ Economical
- ☀ Delivers 24 Hour Protection
- ☀ Prevents False Alarms
- ☀ Customised to Your Needs
- ☀ Offers You Peace of Mind
- ☀ A Powerful Management Tool

At RemGuard Visual Management we have been at the forefront of remotely monitored CCTV for more than a decade, continually improving and refining the service we offer. We are also actively involved in the drive for effective industry standards through our membership of the BSIA (British Security Industry Association), including BS 8418 which covers detector activated CCTV.

The RemGuard 'intelligent' event-driven solution, with cameras and detectors carefully positioned around a site, linked to our Remote Video Response Centre (RVRC), is increasingly finding favour with occupiers of commercial, industrial and public sector premises across the UK – all anxious to protect their property from harmful attacks.

“This intelligent CCTV solution has proven its worth, helping to detect and crucially lead to the arrest of two criminals on site at night.”

Owner – Motorcaravan Dealership

COMBATING false alarms

As events are confirmed visually; false activations are very much the exception rather than the rule, with solutions complying with the latest BS 8418 standard capable of delivering rates of under 10%. Not surprisingly, this means that the police are enthusiastic supporters of remotely monitored CCTV.

STOP

// The RemGuard service works well...it reacts quickly and that is important because thieves can do a lot of damage to vehicles and property in a short time. //

Security Manager – Freight Depot

STOPPING CRIME in its tracks

Today's security solutions have to be able to stop crime before real damage can be done, whether it be combating the headache of low level petty vandalism or hardened criminals stealing to order. Remotely monitored CCTV certainly scores highly in this regard, helping to keep your insurers happy and your premiums under control.

protection around the clock

CUSTOMISED service

At RemGuard we understand that no two sites are the same. Unlike many other providers of remotely monitored CCTV we actually produce our own RemVu transmission equipment and the sophisticated software that drives it. As a result when the equipment is installed on site it is uniquely configured to meet your individual requirements. Our highly skilled technical engineers can programme in features so, for example, gates can be opened automatically if certain events occur, or staff can enter a site via a specific route at key times without comprising the security of the overall site.

// *Our refuse trucks are protected both inside garage areas and out in the yard.* //

Local Authority
Depot Manager

Our event driven service gives peace of mind day or night, providing a vital first line of defence. Its versatility has already been demonstrated in numerous installations across the UK, including:

- Bodyshops
- Builders' Merchants
- Caravan Dealerships
- Concert Halls
- Freight Depots
- Local Authority Depots
- Manufacturing Plants
- Motor Dealerships
- Office Developments
- Quarries
- Retail Parks
- Schools and Colleges
- Sports Grounds
- Tourist Attractions

an ECONOMICAL solution

Remotely monitored CCTV has never been so affordable. It costs only a fraction of the price of conventional manned guarding. A special 'free for use' offer on our transmission equipment, including the latest BS 8418 compliant RemVu Aquila, makes the RemGuard service even more attractive. Available to customers who sign-up for a monitoring contract, this offer effectively eliminates the cost of the equipment, with potential savings running into thousands of pounds.

// *When a window was smashed, RemGuard's operators picked it up instantly.* //

KEY

Out of Hours

- 1 Remotely monitored CCTV protects sites out of hours.
- 2 Strategically placed detectors and cameras are ready to pick-up intruders.
- 3 When detectors are triggered images are transmitted to the Remote Video Response Centre (RVRC) via ISDN line or Internet broadband connection.
- 4 At the RVRC operators visually confirm what is happening, issue verbal warnings and rapidly alert the police. The quality of information provided ensures a speedy police response and each event is recorded for possible criminal prosecution.

Powerful Management Tool

- A The capabilities of our advanced remotely monitored CCTV service are constantly being refined. A good example of this is the ability to access images on-site during working hours or by managers at home around the clock. This can help you to keep in touch with what is happening, even in your absence, including checking on the arrival of a crucial delivery.

QUALITY matters

At RemGuard we take pride in the quality of service we provide to customers. This commitment is reflected in the Investors in People award for training and development and our management systems are accredited to ISO 9001:2000. The Remote Video Response Centre (RVRC) also complies with BS 8418 – the standard for detector activated CCTV – and holds a National Security Inspectorate (NSI) Gold medal. The RVRC only employs operators who are trained to the highest possible standards and security screened in accordance with BS 7858:2004.

The RemGuard service is available across the UK, backed-up by an extensive network of approved installers.
